

**NEW 2009!!!!!!**

**Healthy Homes**

Do you ever wonder if what's in your home is making you or your family sick? Not sure what green cleaners to use and if they really work? Come find out how to make your home free of harmful toxins with improved indoor air quality. Based on the latest research, this interactive workshop will combine class exercises and presentations to educate you on the strategies necessary to assure your home is a healthy and safe home. The instructor for this class is Paula Cox, a Senior Environmental Health Specialist with 10 yrs of experience working for Guilford County Dept of Public Health. She is also an approved regional trainer with the National Center for Healthy Housing and an EPA certified Lead Based Paint Inspector/Risk Assessor.
