

How to install Adobe Flash on Windows

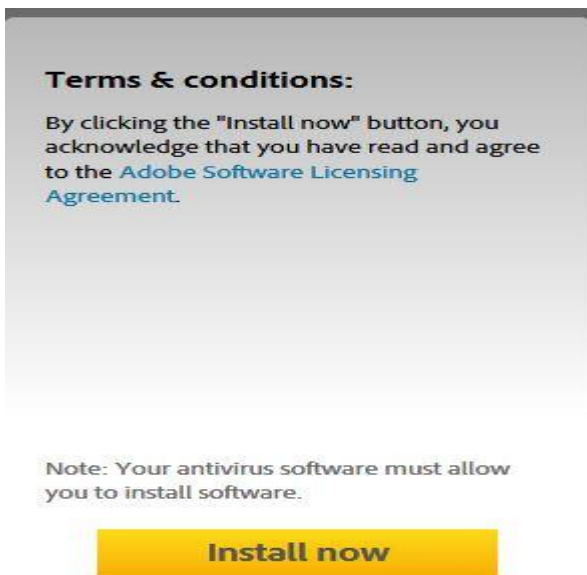

1. Open Internet Explorer.
2. Go to <http://get.adobe.com/flashplayer/>. It should bring you to the page shown below.

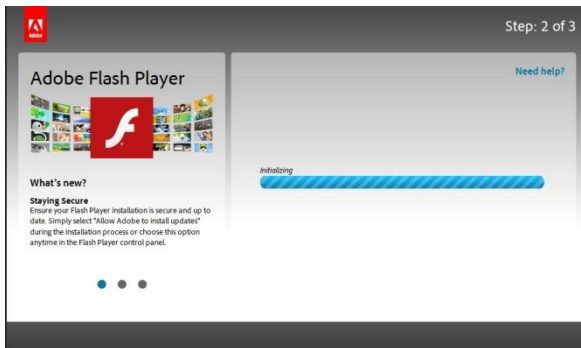

3. Uncheck the box under "Optional offer:" so you do not download and install any additional software.

4. Next, click the "Install now" button to start the download of the latest version of Adobe Reader.

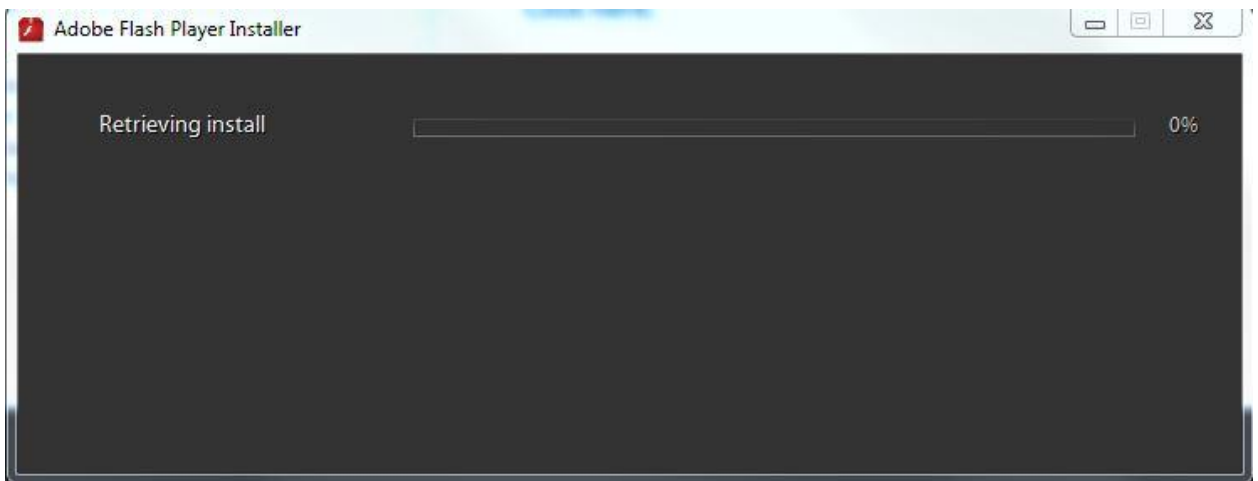

5. You should see the next page in the download process shown below.

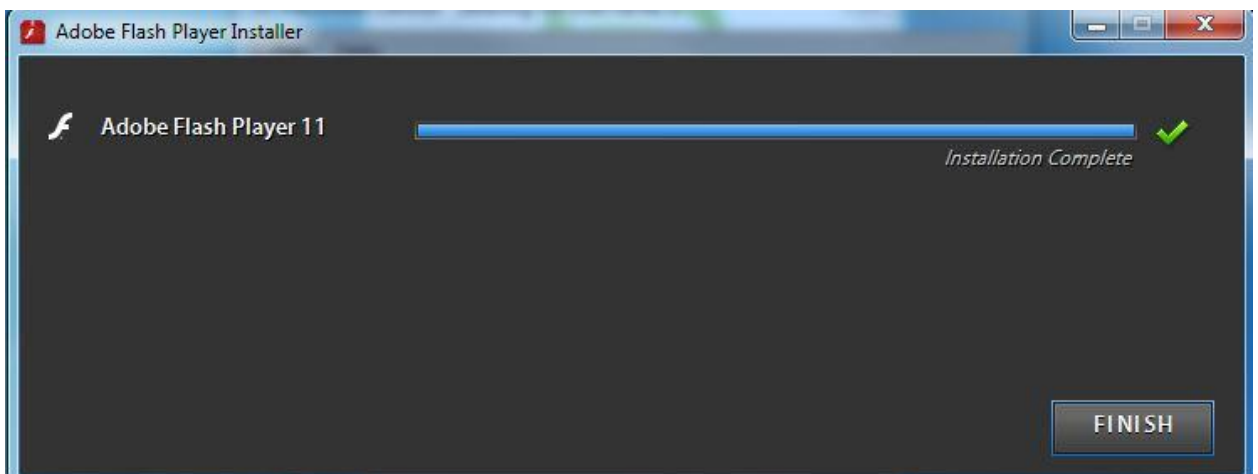

6. At the bottom of the page, you should see the information bar. Please click the “Run” button.

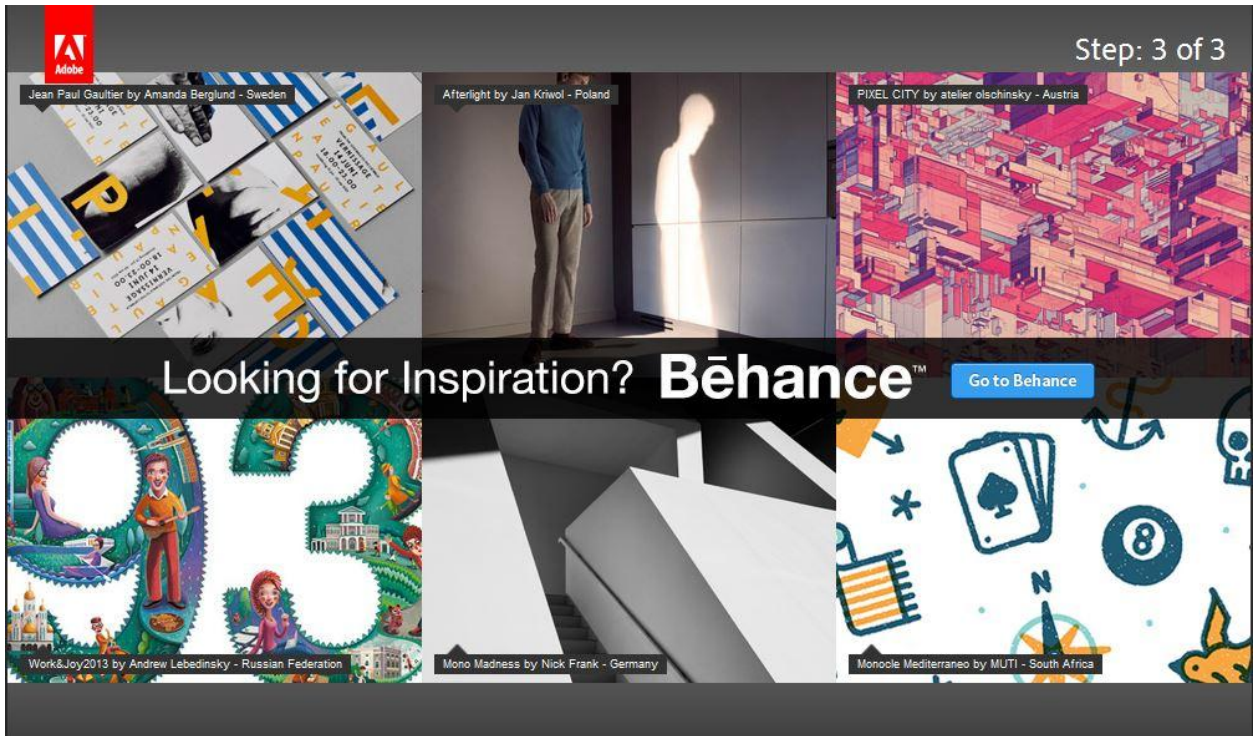

7. The Adobe Download Manager should open and download the Flash installation package, as shown below.

8. Once the installation is finished, you will see a message stating “Installation Complete”. Click the “Finish” button as shown below

9. A browser window will open after the installer window closes, to show that the install has completed successfully. The window will look similar to the image shown below.

10. You have successfully installed Adobe Flash on your PC! Now you can watch Flash videos.

If you need additional assistance you can come to the Open AT Lab

Monday – Thursday 7am to 6pm

Friday 7am to 5pm
