

How to install Mozilla Firefox on Mac OSX

1. Open Safari.
2. Go to <http://www.firefox.com>
3. Click on the green Firefox free download button.

4. Click the show downloads button in the top right hand corner.

5. Once the download has completed. Double click the Firefox.dmg file. The Firefox installer will open up. Drag the Firefox icon into the applications folder.

Note: If you don't see this file, check in your downloads folder.

6. Double click the applications folder. Drag the Firefox icon down to your dock. This will make Firefox easier for you to access.

7. Click the Firefox icon that is in your dock. A warning message may pop up, click open.
8. The Firefox import wizard will come up, click the continue button.

9. Next, select your home page preference and click continue.

10. Once the import process is complete, click done.

11. Firefox will open up and now you can begin browsing the web.
