

Getting Good Grades

Get closer to your target of good grades with these considerations...

After your first test/quiz, reflect on your performance & identify areas to improve for future assessments

Prioritize your school responsibilities well among your list of other obligations

Make use of GTCC academic & non-academic resources! Tutoring, Counseling, Titan Link, Library, AAS, etc.!

Determine which courses need more work time & build an effective study schedule that is free of/has minimal distractions

Read the syllabus to understand late work, attendance, and grading policies that affect your grade

Follow instructions & double check grading guides. Meet w/ your instructor or tutor to ensure you're on the right track
